I work at the intersection of infrastructure development, global partnerships, and project financing.

Through MSL, I identify major infrastructure opportunities worldwide and connect governments, EPC contractors, investors, and technology companies to deliver bankable projects.

My role focuses on building the right consortium of partners capable of executing and financing complex infrastructure projects.

Typical activities include:

- Identifying strategic infrastructure opportunities globally
- Structuring partnerships between governments, EPC contractors and investors
- Facilitating project financing with global investors and financial institutions
- Introducing advanced infrastructure technologies into emerging markets

With 40 years of international experience, I have been involved in infrastructure initiatives across Israel, Australia, India, Jamaica, Africa, the Caribbean, Southeast Asia and Europe.

Primary sectors:

- Water supply systems
- Wastewater treatment and reuse
- Desalination
- Renewable energy
- Environmental infrastructure
- Mobile water treatment and desalination systems for remote communities

MSL works with:

- Governments and utilities
- Global EPC+F contractors
- Infrastructure investment funds
- Technology companies

Objective:

Transform strategic infrastructure opportunities into bankable projects by connecting the right partners.

Founder & CEO

MSL GLOBAL HOLDINGS INTERNATIONAL LTD

Jan 2015 – Present

Israel

Key activities include:

- Structuring large-scale infrastructure partnerships
- Introducing global EPC contractors to government infrastructure projects
- Supporting development of bankable infrastructure opportunities
- Connecting investors with infrastructure projects worldwide
- Promoting advanced water, wastewater and renewable energy technologies
- Connecting startup and technology companies with investors.

Projects include initiatives in water supply, wastewater treatment, desalination, renewable energy, and mobile water treatment systems for emergency relief and remote communities
